PROJECTS

Employee Scheduler

- Launched a web application for managing employees and their schedules with CRUD operations (currently no persistence).
- Tech Stack incorporates React for UI/UX and Interactivity, Redux (w/ Redux Toolkit) for state management, and CSS for styling and responsive layout.

[Live deployment](#)

Autumn Procurement & Services LLC

- Created Landing page and Services page for a freelance client.
- Developed with open communication during the entire process and the product ended well above the client's expectations.
- Overcame an extreme time crunch, the delivery timeline consisted of only two days.
- Launched product is 100% responsive and has above 90 on all Chrome lighthouse scores.
- Tech Stack includes HTML for UI and Structure, and CSS (w/flex) for responsive design and style.

[Live site](#)

Flashcards App

- Overhauled application showcasing Redux state management using slices and reducers.
- Created the state management using nested objects within the application state.
- Diagnosed five bug fixes in the UI, resulting in a better user experience.
- Tech Stack comprised of React for UI, Redux (w/ Redux Toolkit) for state management, and CSS for styling and layout.

[Live deployment](#)
